## EDUCATION

---

### Frontend Engineering (Self-Taught)

Remote | 2022 – Present

- Pursued structured, self-directed learning with a strong focus on React, TypeScript, and modern UI/UX design principles.
- Completed multiple real-world projects, contributed to open-source repositories, and actively participated in developer communities.
- Continuously advancing technical skills through hands-on experience and adherence to modern frontend development best practices.

### Glorious Ambassadors School (GAS)

- Science Department | WASSCE | 2018 – 2021

## Professional Development & Certifications

---

- The Complete React Developer Course – Udemy
  - Advanced React and Interactivity with JavaScript – Coursera
- Supplemented learning with docs, tutorials, and frontend community engagement.

## SKILLS

---

### Technical Skills

React.js, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, Firebase, Supabase, Git, GitHub, Tailwind CSS, Chakra UI, Responsive Design, Figma, Framer Motion, Gsap, Three.js

### Soft Skills

Strong attention to detail, self-driven, effective communicator, collaborative team player, quick learner, and passionate about user experience and design.

## WORK EXPERIENCE

---

### **Frontend Developer - Kaino Tech | Full Time | Sept - Present**

- Engineered modern, user-centric interfaces using React, Next.js, and Material UI, ensuring seamless and responsive user experiences across devices.
- Implemented robust state management solutions with Redux and Context API to optimize data flow and application performance.
- Integrated RESTful APIs and third-party services in close collaboration with backend teams to ensure smooth and reliable data exchange.
- Translated UI/UX designs and wireframes into fully functional, accessible web applications in partnership with designers and product stakeholders

### **Frontend Developer - Vendors App | Full Time | Dec 2024 - Present**

- Architected and optimized a scalable e-commerce platform, enabling vendors to effortlessly manage inventory, sales, and storefronts
- Crafted scalable and high-performance UI components using React, Next.js, and Tailwindcss, significantly enhancing the overall user experience and interface responsiveness.
- Integrated RESTful APIs and third-party services to streamline core functionalities such as secure payment processing, order fulfillment, and business analytics.
- Implemented reliable state management solutions (Redux, Context API) to maintain seamless data flow and enable real-time application updates

### **Frontend Developer - HNG | Internship | Dec 2023 – June 2024**

- Standardized UI implementation by aligning components with brand guidelines and development best practices.
- Designed and maintained scalable design systems and reusable UI component libraries, ensuring visual and functional consistency across multiple projects.

### **Freelance Frontend Developer | Remote | Jan 2023 - Present**

- Delivered web apps for startups and small businesses.
- Built reusable design systems for development speed.
- Collaborated with backends on full CRUD features.
- Developed UI dashboards, auth flows, media-sharing chat apps.

## PROJECT EXPERIENCE

---

### **Whitelist - Frontend Developer | Sept 2024 – April 2025**

- Engineered a high-performance rental platform designed to streamline interactions between tenants and property owners/managers.
- Built features allowing users to schedule viewings, submit rental applications, and connect directly with property owners or managers.
- Developed property management tools that enable owners to **showcase listings**, **track applications**, and **communicate with tenants** efficiently
- Implemented a curated property listing system, displaying detailed descriptions, high-quality images,

### **Nexview - Frontend Developer | August 2024 – Feb 2025**

- Developed an AI-powered application that generates dynamic interview questions, analyzes user responses, and provides instant feedback.
- Implemented real-time data tracking and result history to help users monitor progress and areas for improvement.
- Designed a clean, user-friendly interface with React and Tailwind CSS for an intuitive interview experience
- Integrated speech-to-text and natural language processing (NLP) to assess tone, clarity, and content quality

### **Twit\_Flash - Frontend Developer | Nov 2024 – March 2025**

- Engineered core features including user profiles, real-time chat, content sharing, likes, comments, and notifications to foster engagement.
- Integrated authentication, trend discovery, and privacy settings for a secure and personalized user experience.
- Implemented responsive UI with Tailwind CSS and Framer Motion to ensure smooth interactions across devices.

### **React Secure Input (NPM Package) – Package Author | April 2025 –June 2025**

- Built a secure and customizable React input component suite—including inputs, textareas, password fields, and selects—each with distinct, user-focused features.
- Implemented functionality such as input masking, visibility toggles for password fields, dynamic theming, keyboard accessibility, and seamless UX across component types.
- Documented usage with Storybook and published the package to NPM for public use.
