EDUCATION

Self-Taught Frontend Engineering (*Remote, 2022 – Present*)

- Focused on building production-ready web apps using React, Next.js, and TypeScript.
- Completed several real-world projects, including open-source contributions.
- Continuously expanding expertise in UI/UX, accessibility, and modern frontend practices.

Glorious Ambassadors School (GAS)

Science Department – WASSCE, 2021

EXPERIENCE

Frontend Developer - Kaino Tech | Sept 2024 - Present

- Developed responsive, user-centric web interfaces using React, Next.js, and Material UI.
- Integrated RESTful APIs and optimized data handling, improving app load time by **30%**.
- Collaborated with designers and backend engineers to build pixel-perfect, accessible user experiences.

Frontend Developer - EteachNow | August 2025 – Oct 2025

- Developed and deployed scalable digital education platforms, empowering teachers and institutions to deliver learning globally.
- Designed and implemented an intuitive real-time auction flow, improving user engagement and transaction efficiency.
- Collaborated cross-functionally with backend engineers and product designers to ensure seamless API integration, secure payment processing, and a streamlined user experience across platforms.

Frontend Developer - VendorsApp | Dec 2024 - Present

- Translated complex UI/UX designs into fully accessible, production-ready web applications, enhancing the scalability and performance of the company's e-commerce platform.
- Optimized the storefront experience to deliver faster load times, improved navigation, and a more intuitive shopping flow.
- Collaborated with backend engineers and product designers to ensure seamless API integration and a frictionless user journey across devices.

Freelance Frontend Developer | Jan 2024 - Present

- Delivered web apps for startups and small businesses.
- Built reusable design systems for development speed.
- Delivered scalable dashboards and real-time user interaction features with a focus on seamless UX.

PROJECTS

Whitelist - Frontend Developer | Sept 2024 – April 2025

A high-performance rental platform connecting tenants and property owners.

- Built interactive features for viewing schedules, applications, and real-time communication.
- Developed property management dashboards and integrated REST APIs for seamless data flow.
- Designed responsive UI components with React and Tailwind CSS, improving user satisfaction.

Decklo - Co-Founder & Frontend Developer | July 2025 – October 2025

A platform that helps startups pitch and connect with the right investors.

- Co-founded and led the frontend development of Decklo, focusing on creating a smooth, intuitive user experience for both founders and investors.
- Developed dynamic, responsive web interfaces using React.js, Typescript, and Tanstack Query to ensure seamless investor-founder interactions.
- Collaborated with cross-functional teams to refine workflows, enhance performance, and maintain a consistent, modern UI design system.

Nexview - Frontend Developer | August 2024 – Nov 2024

An AI-powered tool that helps users practice interviews with instant, data-driven feedback.

- Developed interactive user interfaces with React and Tailwind CSS, enabling candidates to engage in realistic mock interviews with real-time feedback.
- Integrated speech-to-text and natural language processing (NLP) technologies to evaluate user tone, clarity, and content quality for performance insights.
- Implemented real-time progress tracking and detailed result history, helping users identify strengths and areas for improvement

Twit_Flash - Frontend Developer | Nov 2024 – Jan 2025

A social networking web application built to enhance real-time communication and user engagement.

- Developed and optimized core social features, including user profiles, live chat, content sharing, likes, comments, and notifications.
- Implemented a responsive, high-performance UI using Tailwind CSS and Framer Motion to ensure smooth, interactive experiences across all devices.

React Secure Input (Npm Package) – Package Author | April 2025 – June 2025

- Built a secure and customizable React input component suite with masking, password toggles, and keyboard accessibility.
- Implemented dark/light theming, Storybook documentation, and published for public use on NPM.
- Achieved over 366+ *downloads*

Technical Skills

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js, React Native
- **Styling & UI Libraries:** Tailwind CSS, Chakra UI, Material UI, Framer Motion, GSAP
- **Tools & Platforms:** Git, GitHub, Figma, VsCode
- **Other:** Responsive Design, Accessibility, Performance Optimization

Attention to detail • Self-driven • Effective communicator • Team player • Fast learner •
Passionate about UX
